

## **Bombardier Awards Dynamax Aerospace Contract for Learjet 85 Aircraft Structural Components and Primary Flight Control**

**WHEELING, IL, June 28, 2011** – [Dynamax Inc.](#) announced today that its aerospace operations has received purchase orders for [high-precision machined metal components](#) for the Bombardier\* Learjet 85\* business jet. Dynamax will provide structural components for use in the manufacture of the aircraft bulkhead, fuselage and wings. Dynamax will also produce several detailed parts for the initial phase of the Learjet 85 program primary flight control package, which includes aileron, elevator and rudder components.

Bombardier selected Dynamax because of its demonstrated responsiveness to strict design specifications and demanding delivery times. “We are extremely pleased to be working with Bombardier,” stated Dr. Richard Zic, Dynamax founder and CEO. “Our continued relationship is a result of our commitment to [advanced technology and lean manufacturing](#),” he added.

Launched in October 2007, the Learjet 85 aircraft fits between the midsize and the super midsize segments of the market. The business jet is expected to have a high-speed cruise of Mach 0.80 and a transcontinental range of up to 3,000 nautical miles (5,556 km). Dynamax will build the components at its Wheeling, Illinois facility.

### **About Dynamax Inc.**

An ISO 9001 and AS9100 registered company, Dynamax is a leading designer and manufacturer of high-precision machined components, injection molding and tooling, sub-assemblies, specialty machines and machine tool spindles. From early stage production through dockside ready components, Dynamax is committed to developing fully integrated solutions that enable its customers to improve their competitive advantage in today's marketplace. [Celebrating 25 years of excellence](#), its customers include some of the largest names in the aerospace, defense, transportation, energy, medical, and mining industries.
